Seed Round Pitch Deck

Blend

The delivery stack is a mess

Problems

Dashboard Overload Merchants juggle between 4–6 separate delivery apps devices daily, each with its own orders, menu, report and login.

Unstable APIs Frequent changes from delivery apps API disrupt operations and require constant technical upkeep.

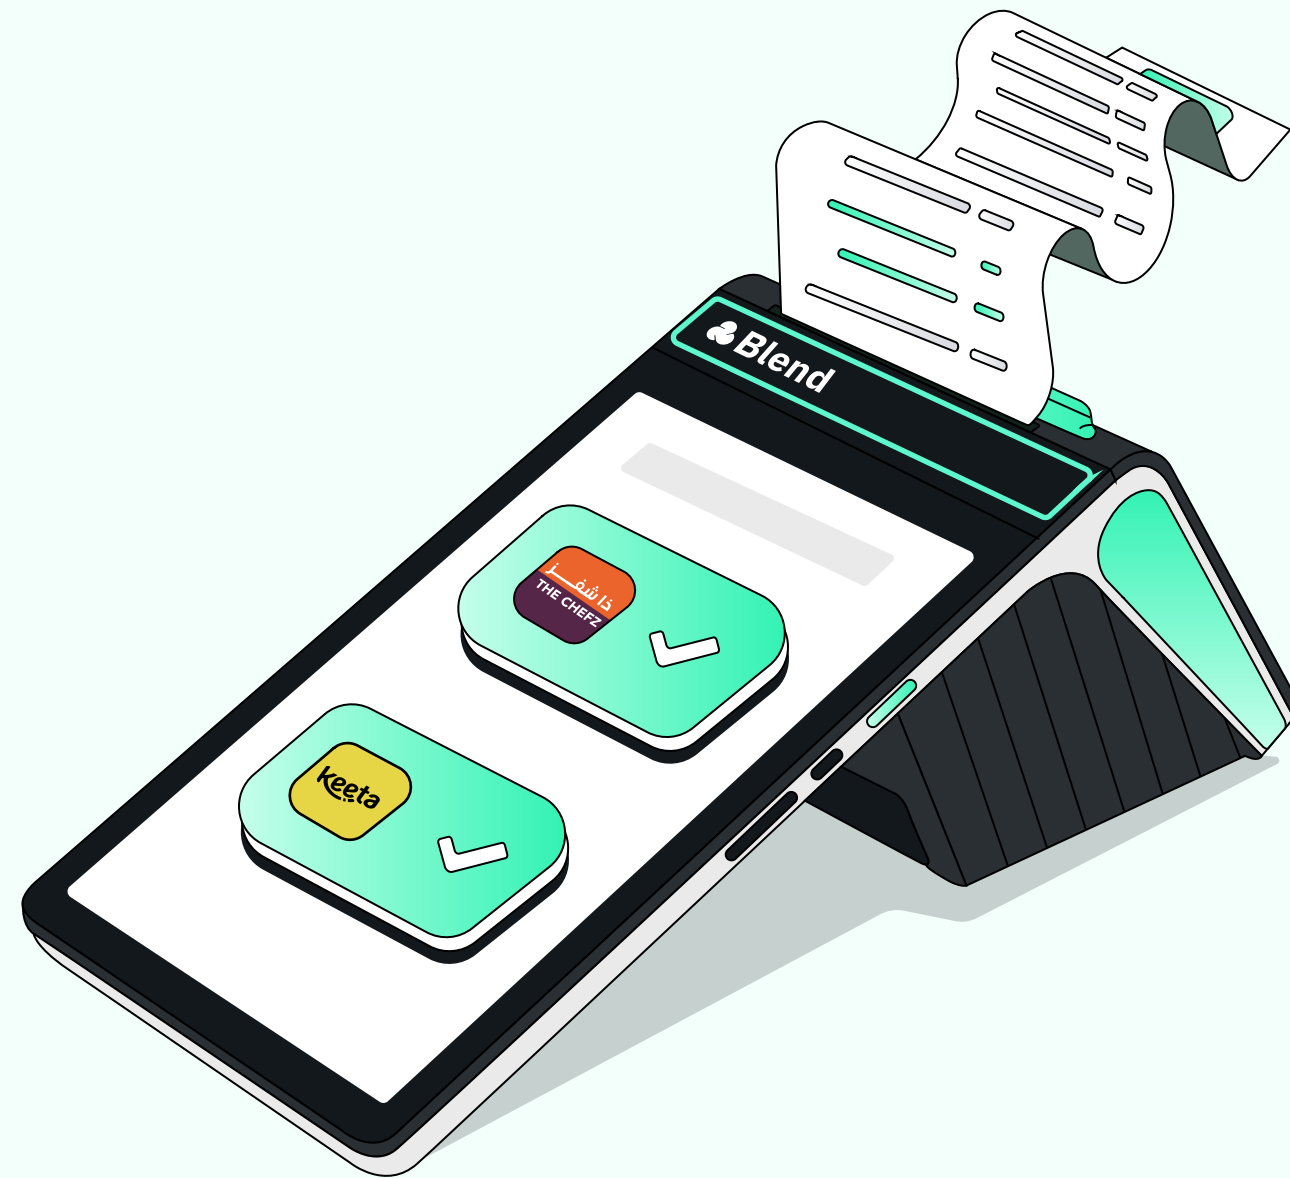

POS Disintegration Most POS systems have lack of delivery apps integration, leading to data silos and daily operation chaos.

One screen to unify all aggregators

Solution

Middleware Architecture

Blend operates as a hardware-less SaaS layer between POS systems and delivery platforms.

Auto-Sync & Error Reduction

Menus, inventory, and availability sync automatically to reduce human error and order failures.

Data Overview - Quick Decision

Multiple location overview with activity log for operation incident or improving.

Saudi market is ready, tech still - until now

Why Now - Market Timing

52K Locations Ready

Saudi Market already has over 52,000 locations using delivery apps, yet only ~20% are integrated with middleware.

Vision 2030 Growth

Saudi market is set to double, reaching 100K+ enabled delivery locations.

Untapped Automation Demand

Rise in ghost kitchens and virtual brands drives urgent need for operational automation.

Target Sectors

Restaurants and
Cafés

Hypermarkets

Home-Based
Businesses

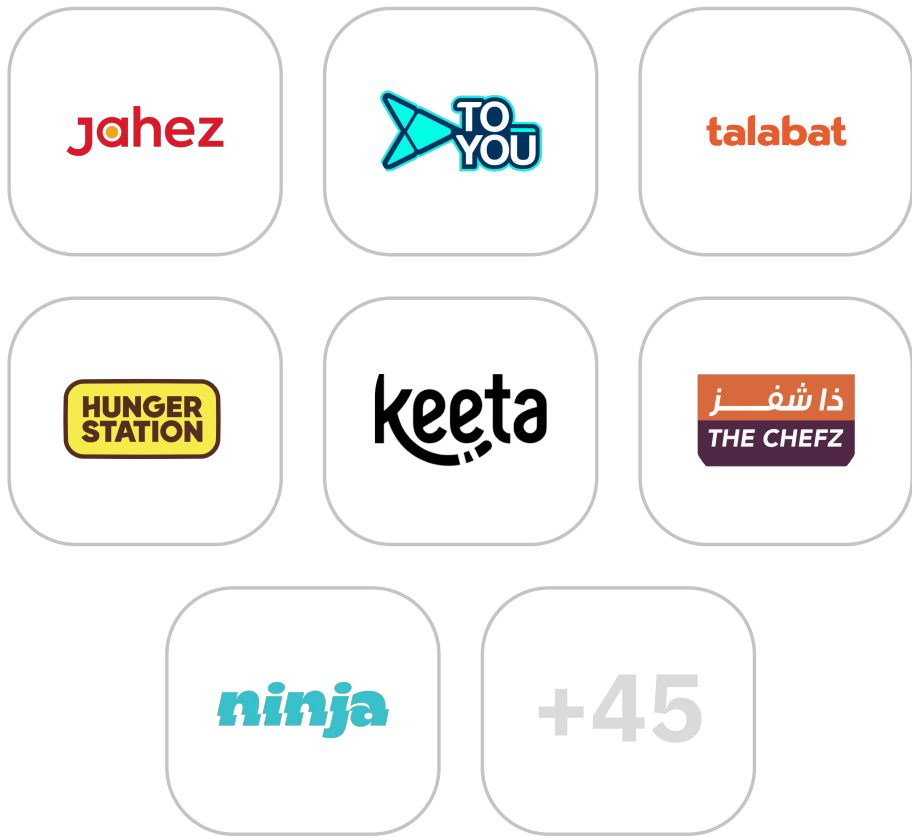

Sweets
& Bakeries

Pharmacies

* We target any merchant depends on delivery apps for online sales.
